The Secretariat  
 Technical Committee - Fundamental Human Rights  
 World Trade Centre  
 KEMPTON PARK

As it has apparently been decided not to incorporate the Charter of Rights for Persons with Mental Handicap, in or as an addendum to the proposed Interim Bill of Fundamental Human Rights, it becomes essential that the composition of the proposed Commission includes people with both the sensitivity and special knowledge, experience and expertise necessary to advocate for those people who have limited intellectual ability.

Should the Committee require additional input in this regard it is suggested that they contact the Chairman of Reef Forum, which is a representative body comprising both the organisations (Schools, Centres and Workshops) and parents and individuals connected with the field in the PWV area. He is Mr John Rees, who is also Executive Director of the Avril Elizabeth Home telephone (011) 828-5243.

Telephone (611) 620-3243.

I trust that you will agree to protect the fundamental human rights of those who are least able to exercise or often are not even aware of or capable of fully understanding their rights, namely those people who have an intellectual disability. [169]
