The Secretary
Technical Committee on Human Rights
World Trade Centre
KEMPTON PARK

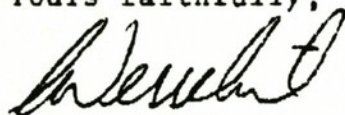

For Att: Melody Emmett

On the 7th October we at Cresset House heard that a commission to monitor fundamental human rights has been recommended to the World Trade Centre and that some thirteen commissioners will be appointed.

It is our belief that the needs of the mentally handicapped must be represented on this commission. We appeal to the committee to include someone who is aware of the special needs of those with mental handicap. On the commission this person would act as an advocate for and on behalf of the disabled. As a minimum requirement the Commission should call on a representative body such as Reef Forum who are aware of the special needs of the disabled.

We trust that you will take this request seriously and we take this opportunity to wish you much strength for the important task you are carrying out on behalf of all of us.

Yours faithfully,

COENIE WESSELINK
