The Chairperson

We as a multi racial group of concerned South African Citizens, would like to know from you the following.

1. On whose vote was it decided that the ANC become a major negotiator for the country's future?
2. Speaking about democracy - what are the basis of bilateral agreements when so many different parties are involved in the constitutional talks?
3. Why after all these years of the government insisting that the TVBC states are and always will be sovereign self governing territories are we now told that they will cease to exist as such. On whose mandate was this decided?
4. I, in my personal capacity, wish to know why after all these years of correspondence with the Boputatswana government have I still not received a definite reply from them concerning transfer to me of two plots of land left to me by my father (copies of correspondence included)?
5. We request that the government let all the citizens know what steps, legal or otherwise, will be taken against the chief ministers of Lebowa and Kwa-Ndebele for their alleged excessive wastage and squandering of the South African taxpayers money.

Thank you in anticipation.
