Submission to the Technical Committee on the Transitional Executive Council

1. The objects of the Council as set out in paragraph 3, need to be extended to give a directive to the TEC and all its sub - councils, that the full participation of women in the transition and electoral process needs to be supported and promoted.

Therefore we propose the following amendments be included as paragraph 3 (a) (iv) and existing para 3 (a) (iv) becomes (v).

Paragraph 3 (a) (iv) should read :

- ensure the full participation of women in the transitional and electoral processes.

2. The objective of the sub-council on women is to promote the full and equal participation of women during the transition and in the electoral process. In order to acheive the desired outcome of the sub-council, it is important that education of the general public relating to the nature of gender oppression be undertaken.

Therefore we propose the following additional paragraphs to be inserted between paragraphs 17(f) and (g) as follows :

- to commission the development of educational programs which promote the full participation of women in the electoral process and shall be targeted at the general public.
