13th March - with Sauerman - went to Worcester. Was a meeting called by the PAC. I know the people who attended meeting were PAC members. The people who made speeches were PAC members. The listeners were Banter - incl. a lot of adult males. Approx. 7. I can't remember now how many were there. I was on duty. Took down notes what was being said. I took down those notes I was supposed to take down. I now have notes.

Exh. "K.K."

I am there. There was being spoken. At conclusion of meeting I handed notes to Sauerman & he initialled individual pages & put date on. Date is 14th March on each of pages. I had overnight & I only handed in the fol. morning. During night I did not read through them. I made no alteration that night.

People present: 2 or 1.

Started reading at 11:55. - ends 12:5.

Inserted after typed - word "want" - in order to make sense. In office when Sgt. Smit handed us our notes to revise. I then inserted "want". Typist

The Notes were with me the night of the meet & I did head

or read through the again.

I inserted the word "want" after the notes had  
been typed. I inserted the word want in  
order to make sense. That was the office when  
Sergeant Small handed us our Notes to revise  
before coming to court. Then I saw the "want"  
was missing & I inserted it.

I hear you say the task was too big.

I do understand English questions.

No formal education after leaving school.

Don't read a lot.

Read at times. Books in English.

Might be many years ago. but remember last  
book I read in English. but remember how many.

fair understanding of both English & Afrikaans.

I could not say that my knowledge of English is good. |

I have difficulty writing English. | (2/2)

Can't write in Xosa.

To enable while speaking & understand my notes

Propose - as much as I could get down.

Instruct - I was told to write down what was being said.

Not that I was taking notes for a case & didn't think there could be a case.

Purpose - to give speakers an idea more or less of what was being said by the speakers.

I could not take down everything that was said

I did not take down what I thought to be most important but what I could get.

H.C. Saven & Vlok accompanied me.

I depend entirely on these notes for what speakers etc. were made on that occasion.

Took pencil & notes.

I don't think I erased anything there unless I just scratched.

It's my practice when I come back to the office, if I go through my notes & if I see anything wrong with my notes I rub it out & replace it before the typist gets it.

Indeter sentences that didn't make sense & corrected them.

But could never write out whole page.

I don't know whether it could be less than a  $\frac{1}{10}$ th

KKPT - 4.

Elliott was written in after the meeting. I wrote his name down after his speech. I went up & asked him his name & he said Elliott Mguentshen. The I wrote it down. I started to write it through & then altered it as I was getting it wrong.

When Chan announces next speaker I take down the surname & write it on each page. Only after ~~the~~ speaker has finished do I go up & ask him his name.

I write the surname during each speech, at top of each page.

As he went along I wrote an E. in front of each name.

Re S. insert.

I thought it was Simon addresses the meeting. But when my colleagues afterwards told me it was Elliott & I changed it.

I'd changed it to Elliott before I had decided to insert Lynnt.

I can't explain why Simon there. Lynnt must be checked

Possible Lynnt made a mistake

I didn't change S. to Elliott afterwards. At meeting I changed it.

I put things right in the notes which I'd got very confused

(The boxes 3 months later?)

I could see what was wrong.

KK p 17. - 5. I put ~~right~~ word 'want' when I got to Sergal Smith.

p. 6. - 5 'whi' corrected, followed by 'with his torso.' " "

" - 2 - want, speech (last line) " ...

(And to you + 46 mistakes)

I made some alterations before today, then after Serg Smith  
brought back to me to revise.

I never erased.

(Stuck by that).

I can't remember using a rubber.

KK. p 1., p. 7.

Re p 7. <sup>1.8.</sup> I do see traces of something written before the word  
'sleeping' was written. But this was written at the meeting

I didn't take a rubber to the meeting.

p. 11. Been shot - I rubbed it out.

Don't know where regulars are not rubbed out or only above.

When we see something wrong we just have to rub that out & write the right thing

p. 20. Last 2 lines <sup>erased</sup> obliterated. Possible I put in those lines as lines of the  
speech.

Speake did write those words
