With the process of democratization, we are faced with a major obstacle-that of an ill-informed, misguided, and relatively ignorant population. The major part of the population have not experienced living in a democratic society. The concept of democracy and more importantly freedom is grossly misunderstood and remains abstract.

We need a major effort on the part of business, the private sector, the government and other concerned parties to facilitate the democratization process by preparing our population. South Africans are not ready.

As a South African, a teacher, a student and most importantly a parent who belongs to a minority group I need clarification on the future government's stance on the following :

- 1.0 Principle of Democracy ie. is it a myth?
- 2.0 Bill of Rights - is it something that will be written in pencil, ready to be amended if not all together erased?
- 3.0 Political Process ie. another joke like the rest of Africa?
- 4.0 Economic Policy ie. a banana republic?
- 5.0 Education Policy ie. abolition of separate Education Depts
- 6.0 Taxation Question ie. the future of the overtaxed 'middle class'
- 7.0 Government Overspending, Abuse of Power, Accountability and Responsibility and
- 8.0 Government Reduction in size ie. a must.

Furthermore, I believe that the education of our population must embrace the following :

- Economics
- Productivity
- Environmental Affairs and
- Ethics.

It is my belief that Codesa should address the above issues in order to ensure a successful transition into a democratic society.

The nation requires that the above matters be addressed. I as an individual require a detailed response from Codesa.

Thank you for your time and co-operation.

Regards,

D. Naidu

NB. My last telephone call to the Management Committee of Codesa was not returned and I do hope that certain ethical principles would prevail throughout the workings of Codesa and into the future ie. PROMISE KEEPING.
