19 February 1992

Dear Sir / Madam

I refer to an article in the Argus requesting interested organisations to make written submissions on various ^{matters} dealt by Codesa Working Groups.

I would like to request the full terms and reference of Codesa Working Group "1." dealing with the creation of a political climate and the role of the international community.

Our organisation has for the past three years been marketing the Cape Flats Region. Today we are working on a program which will encourage investment and development in an area where job creation is of vital importance to economic stability and the future development of the area.

Our approaches to organisations and bodies from the bottom right up to the State President's Office have only been met with a pat on the back for a job well done but nothing else.

In the hope that Codesa might be the way to go I anticipate a response at your earliest convenience.

Yours Sincerely

Aly Khan

Director
