TO ALL LEADERS WITH SENSE AND COURAGE

I write this in English, but it is for ALL people of the world, in particular at this time, our own South Africa.

CODESA - SURVIVAL -

Which is more important? We MUST come down to earth, get back to nature - because without nature our earth is doomed.

C F B C -

Conservation - Conserve and care for what we have, in every way we can - every one of us living on this earth who can think. Conserve and care, to have.

Food and water without which we all die. Look at the starving millions - why? what to do about it? why? - too many people. what to do about it? -

BC - Birth Control, or we all and the world cannot survive.

To survive we need food - to get Food we need money.

To get money we need a job. Without a Job. Crime & Violence.

But too few jobs - too many people. What to do about it?

Investment? Development? Yes, but slowly, with great care - because so often it destroys what we have to conserve to survive, physically and mentally.

In the meantime, for all who cannot get a job, provide basic food to survive, coupled with birth control - to prevent compounding the problem - because if we cannot feed ourselves how can we feed more children?

In South Africa the cry is "Education - Housing - equal everything for all" - How? Who will pay for it all?

1) Money - Remember the old Defense Bonds? or now BoP Bonds? Our Govt. should launch Survival Bonds - interest-bearing, monthly prizes, redeemable after 1 year - who would not invest in those?

2) Jobs for many - supplying basic food with birth control (3-monthly injections for all dependants of child-bearing age) - while teaching and training basic home and farming skills in own home areas - which would

3) stem the tide to the job-less, home-less cities.

4) Our Govt - pay basic salaries to those without jobs to build schools, lay out the grounds, make the furniture, etc.

in own home areas - while own people study to teach  
in own schools -

5) Now punish crime effectively - Kill all crooks, especially  
thieves, burglars, highjackers, muggers, rapists, and those  
committing murder, fraud, bribery and corruption -  
• (what a world we live in! - us humans)

All the above 1) 2) 3) 4) + 5) - Non racial.

Then we can all work together - in and for our  
beloved country - Conserve, don't destroy - and be  
proud of the Springbok, the flag, and our anthem  
which can be translated a song in all our many languages  
Nature - animals, plants, birds - all are different,  
we are different - we must care for nature as much as  
ourselves, because we cannot survive without her,  
and respect and do unto others as we would be done by.

Leaders - Good luck.      CFBC - vital!
