RE: FACILITIES FOR COVERAGE ON RADIO 2000

Dear Marius

As discussed yesterday we are planning to take as much as possible of the Codesa proceedings live on Radio 2000.

To do this we will need a dedicated table in the press gallery from which the two anchors will be able to view the proceedings and report. What is required is a table with a good view of the hall, and relatively easy access to power and feed points. In other words we want to be able to put our cables up against a wall or directly into the roof so that people do not keep tripping over them.

As far as the other studio and feed facilities for radio are concerned we will fit in with the general requirements. However, given the importance of the Radio 2000 broadcast, I think a case can be made for the committee to meet these requirements.

Yours sincerely

Ed Richardson :: Executive Producer: Radio Today/Audiomix (and co-ordinator of audio coverage on SABC of Codesa proceedings)
