

Way forward

RESOLUTION: ABORTION

Whereas we

- * noting that thousands of women have died and will continue to die every year as a consequent of illegal abortions, and also the number of abandoned babies whose mothers face the real inability to sustain those children.
- * recognising the social orientation that limit our ability to deal with sensitive issues such as abortion,
- * acknowledging the lack of consensus from regions and from the Health Commission on this issue.

~~strongly recommend/propose~~

- * that this Conference commit itself to taking up the issue of Abortion at local, regional and national levels through awareness education and discussion with the aim of reaching consensus within the Organisation on this real issue.
