Dear Chairperson

This representation applies to working groups 1, 2, 3, 4 and 5:

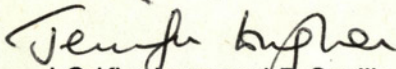

Do not overlook the human resources which we need to transform our nation.

During the last 40 years, Women from all communities have initiated, guided and underpinned the pressures for negotiation and peace.

While negotiating a new constitution, men must learn to use the powerful resources available in the other 53% of our population.

We urge you to include more women in the CODESA process

Yours faithfully

J G Kinghorn and B Coville
