Dear Murphy,

As you might know the European AAs had a campaign amongst Members of the European Parliament to endorse the call for an Interim Government. Inter Alia they comment on the constitutional proposals of the NP. One third-276 MEP signed the statement which will be delivered tomorrow morning by a small delegation consisting of Chris Gilmore (Italy AA) and Peter Hermes (Dutch AA). Hermes discussed that with Zach de Beer. We hope de Beer will be in the morning to receive the signatures (lis) and the covering letter. In case that is impossible Hermes will try to find you to present it.

I just heard from Peter that the covering letter did not come through properly that is why I send you a copy for which Peter Hermes will ask you.

It was good news for me to hear you are involved with Codcsa.

many greeting from Amsterdam.

Dr. Zach de Beer,
Chairman Steering Committee
Johannesburg

Amsterdam/Johannesburg, 19-12-1991

Dear Dr. de Beer,

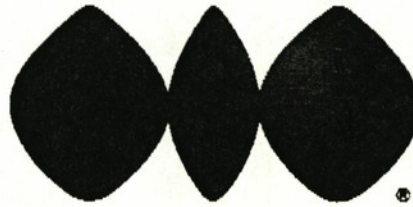

For decades the Anti-Apartheid Movements in Europe have campaigned for the eradication of racism in South Africa and in support of the liberation struggle. Churches, political bodies, trade unions and governments were all involved in voicing their concern, as deeply felt by the citizens, against apartheid and their longing for a truly democratic South Africa. Europe follows closely the process of change and transition in South Africa.

We are pleased to present to you - through a Dutch/Italian delegation representing the Liaison Group - the latest result of the positive involvement and engagement on the part of the European Parliament. Members of nine out of the ten Political Groups in the European Parliament, including the leaders of four of the Groups have endorsed a statement initiated by the Liaison Group of National Anti-Apartheid Movements of the European Community. They call for the "establishment of an Interim Government for the period of transition". They are also supporting the adoption of a new non-racial constitution and recognize that the National Party's constitutional proposals - published in September - "seek to entrench white minority rule in a new form". The 176 signatories represent one third of the members of the European Parliament.

We hope the Convention will succeed in removing all obstacles for a fruitful outcome; that the identified and unidentified forces engaged in fomenting violence will be effectively stopped. The Liaison Group recently campaigned for the release of the political prisoners. We rejoice the release of many of them in Bophuthatswana and express our wish that all remaining political prisoners in South Africa will be released quickly.

We are fully aware of the crucial importance of the Convention to reshape the future of South Africa and wish the participants success in working towards the establishment of an effective Interim Government capable of responding to the social and economic needs of the overwhelming majority of the South African people; and of establishing the conditions needed for the adoption of a new constitution for a united non-racial democratic South-Africa.

Fons Geerlings, member of the secretariat of the Liaison Group
