Dear Sir

WRITTEN REPRESENTATION TO C O D E S A: 2 MARCH 1992

The importance of arriving at a negotiated solution for the New South Africa cannot be overemphasised.

This country, being totally unique in terms of its attributes, (mineral wealth, diversity of peoples, languages, infrastructure, etc), has to arrive at a UNIQUE answer regarding the future.

We cannot look at external systems of government from other countries, and try to adopt any one or combination of any of these systems. We have to develop our own.

Because of the very fact that we have a history of 'apartheid', we must ensure that we do not negotiate the same thing in reverse, and then just call it by a different name.

One of our most pressing needs right now is to have stability and peace: the only way we can have it quickly is by the assurance that no ONE group or party may dominate, and that ALL minorities can have a say.

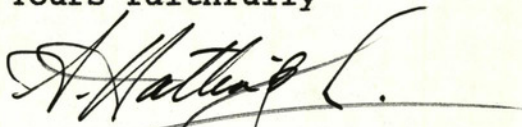

We therefore propose the PERCENTAGE VOTE SYSTEM.

A system where each 'body' (formal representative group/ party) has EQUAL say and there is no majority, nor minority, vote.

Each member of each party has the right to vote (on an issue, or for a representative/leader). The results for each party will be drawn up in percentages. Each percentage will then be taken into account with respect to the total outcome.

We know that, by creating a unique system for a unique country, one that has never been used before, THIS country can truly be a pioneer to the rest of the world. Should you require further clarification, please do not hesitate to contact us.

Yours faithfully
