RE : SUBMISSIONS FROM THE PUBLIC

A significant number of submissions have been made by organisations and members of the public to the Working Group.

To my knowledge, nothing whatever has been done to determine how they should practically be considered nor have the rapporteurs been involved at all.

The Working Group originally called for submissions and in my opinion it owes those organisations and persons who took the trouble to respond to the invitation not only to acknowledge receipt thereof but to properly consider such submissions, promptly.

Could you please therefore place this item on the agenda for the Working Group Steering Committee and the Working Group agenda for Monday 7 April 1992.
