

POLICY STATEMENT OF THE INTANDO YESIZWE PARTY

The IYP believes that South Africa should not be fragmented into ethnic entities . It is further believed that the creation of TBVC states was a political mistake which has cost a lot of hardships in this country and it is not within the interest of the South Africans.

Our standpoint is thus that all TBVC states should be re-incorporated into South Africa and that as South Africans we all decide the political and constitutional future of this country.

However, we believe that such re-incorporation should be done in an orderly manner taking into account the rights of citizens and investors in those states.

Committees to investigate mechanisms for the re-incorporation will have to be established.

It is our view that the citizens of these atates must be afforded the the opportunity to air their views on the issue of re-incorporation.
